

Belfry Gardens is a private development of individually designed dwellings close to the centre of Dundalk.

The client wanted a high quality reconstituted grey granite with a textured finish and approached Craftstone who had been recommended to him. Craftstone supplied quoins, sills, small keystones for above the windows, the feature lintel above the first floor window as well as the front entrance portico. The canopy above the front door was designed by Craftstone with the top section being manufactured in one piece.

The reconstituted granite features combined with the brick and natural stone of the main structure give this particular dwelling an impressive façade.
