Craftstone

Craftstone Landscape
 Bespoke Landscape Products

www.craftstone.co.uk

Craftstone manufactures bespoke landscaping products that can transform outdoor environments into unique and strikingly beautiful parks, rest areas and gardens.

Crystal Products is an environmentally friendly sustainable product providing endless design possibilities. Manufactured using 85% recycled glass and TTura resin, applications include paving and tactile products, wall panels, benches, seating and tiles.

Architectural cast stone has a wide range of applications including street furniture, coping, paving, balustrading and step treads. It is manufactured in a range of colours and finishes.

Craftstone works closely with Landscape Architects, Local Authorities and Landscaping Companies who are designing public realm spaces and specifying bespoke hard landscaping materials. One-off private dwellings and housing developments requiring unique landscaping features are also included in Craftstone's portfolio.

As part of their service, craftstone can meet with designers at the initial design stage to discuss design concepts and advise on the technical feasibility of manufacture. Samples for approval are also supplied as standard.

Established in the 1980s Craftstone has built a reputation as a specialised manufacturer of high quality products for both the commercial and private sectors. All products are manufactured in a purpose built 30,000 square feet facility by casters with many years experience.

Craftstone is aware of the increasing demand for sustainable materials and is an ISO Quality Assured company.
