It's the details that make your house a home. At Craftstone, we've been adding the finishing touches to residential properties for years.

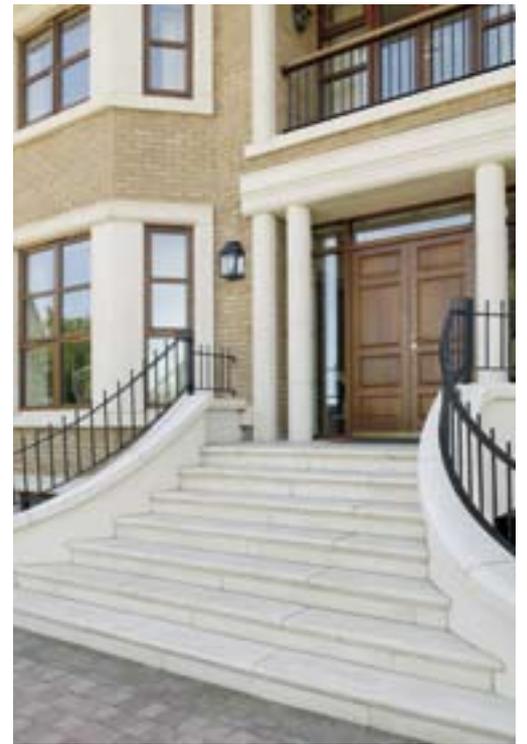

Our commitment to our clients begins with an individual service offering all aspects of design guidance, technical advice and assistance right through to the completion of the production process. Our standard product range includes sills, lintels and quoins. However, our speciality lies in the manufacture of bespoke architect's originals, each produced by casters with a lifetime's experience in the industry. Indeed most of our projects

involve a combination of standard and original elements all carefully integrated according to specific client needs.

This brochure showcases a selection of the residential properties we have been involved with. Hopefully it will be a source of inspiration for your own project. If you require any further help, or would like to discuss your plans with us, then please give us a call or visit us online.
